2. Citations and explanations

The present invention relates to dry powdered substances inhaled to provoke narrowing and mucociliary clearance of the airways. The substances achieve this effect by altering the osmolarity of the airway surface liquid. Examples of these substances include mineral salts, sugars and sugar alcohols.

Australian application AU 27462/92 discloses a liquid salt (NaCl) solution to be inhaled for treating asthma and allergies. Similar disclosures are made in Remington and DE 3518665. The use of salt solutions to treat asthma and allergies is known.

The present invention is directed towards a dry salt for provoking narrowing of the airways and for increasing mucociliary clearance. This appears to be a sufficient distinction from the prior art. The present invention is therefore regarded as novel and inventive.
